

CHIROPRACTIC | NATUROPATHIC | MASSAGE THERAPY

EXTREMITY CONDITIONS

Did you know there are 313 joints in the body and all of them can be adjusted? If you are suffering from hip, knee, foot, shoulder, elbow, or wrist pain, please schedule an appointment and we would be happy to assess your issue and treat the cause of your symptoms. Conditions such as plantar fasciitis, lateral/medial epicondylitis (tennis/golfer's elbow), wrist tendonitis/carpal tunnel, patellar tendonitis/poor knee tracking, hip bursitis, and many other conditions of the extremities respond very well to conservative chiropractic and massage therapy.
