JAW PAIN

Did you know the jaw can cause a myriad of strange symptoms other than clicking or popping or face and mouth pain? The TM joint can be the source of dizziness, vertigo, headaches, ringing in the ears, and even alterations in vision. At Blyss Chiropractic, we are highly trained in the treatment of TM issues. The assessment is quick and easy and can result in various profound positive effects for the patient. Many don't even know their jaw is involved until it gets checked. If you suffer from or have a question about the symptoms described above, don't hesitate and schedule an appointment today!
